Suitable for larger organizations with high demands for overall stability and high variations in load.

*CDN 500 GB/month
*Bandwidth 1 TB/month
*Storage 1 TB
*Automatic scaling based on load

Our Connectors

With our various connectors, you increase the benefits of your ImageVault for the entire organization and make all employees work uniformly with your approved media material. Read more and familiarize yourself with our connectors in this product sheet.

Microsoft Office

ImageVault Connect for Office is designed to make your entire media bank available in Microsoft Office. Find and insert your photos directly into Word and Powerpoint. This helps to streamline and simplify your every day at work.

ImageVault's CMS connectors for Episerver, SiteVision, SharePoint and WordPress gives you a seamless experience, as it integrates as a natural part of your CMS. You gain better control of your approved media so that it is used correctly. With the smart conversion and cropping features, editors are unable to make any mistakes. All files are linked when published from the central media bank in ImageVault, which gives you good control over the use of your media files.

▶ Video

ImageVault Video facilitates the management of video files so you can work with them in the same easy way as with images. Preview and publish all or part of a clip, ImageVault ensures that the video is streamed and can be played in any modern browser and device.

	Free*	Basic	Standard	Premium
Amount of managed video	2 hours	40 hours	80 hours	100 hours
Speech to text			Included	Included
CDN (Content Delivery Network)				Included
Storage & bandwith				1 TB

*Level Free is included in all packages.
 Videos with level Free are watermarked with an ImageVault-logo.

🖼 Media Gallery

ImageVault Media Gallery makes parts of your total media bank available to your public visitors. There are possibilities of allowing visitors to download and / or share files and information. It is also possible to share via social media. Of course you can customize the look and functionality according to your own needs and your graphic profile. With a simple push of a button, you turn on / off various functions in the ImageVault media gallery.

"Clients really appreciate that the solution is affordable compared to building something on their own, ImageVault Media Gallery is a ready-made solution - Fast, easy, simple and without expensive development costs"

/ Lars Dahlin, ImageVault Training

inRiver

Keep control of your media by managing it in one place. ImageVault ensures that your product-related media is automatically synced with inRiver so that, for example, the right versions of product images are always available. At the same time, information from inRiver is returned so that the images always have updated metadata and are searchable.

Creative Cloud CONNECTED

ImageVault Connnect for Adobe makes your entire media library available in InDesign and Photoshop. The connector is easily installed via Creative Cloud and in just a few minutes you are up and running. Work smoothly and efficiently by finding, using, editing and syncing your media back to ImageVault directly from the ImageVault panel in the Adobe App.

💬 Expert Service

Through our Expert Service team you can get further help in solving issues or requests that are not part of the normal support.

Examples of such cases may be to apply the organization's graphic profile in ImageVault Media Gallery, ordering special functionality or other customizations related to ImageVault. You can also get help with migrating from older versions of ImageVault.

🗐 Training

We provide a number of different training courses for ImageVault on-site at client or by web meeting. All cources are specially adapted to meet the client specific needs. Before each training session, our educator contacts you for the desired arrangement. Various courses main areas are:

• Basic user training
• Workshop "Use ImageVault in the best way"
• Administrator training
• Editor training
